

SARVESH NARENDRA YENARKAR

sarveshyenarkar24@gmail.com — +91-9137051883 — Kothguda, Hyderabad

Education

- **Veermata Jijabai Technological Institute, Mumbai**
B.Tech in Electronics and Telecommunication
2017 - 2021
- **Arts, Commerce and Science College, Chandrapur**
Higher Secondary Education in Physics, Chemistry, Maths and Computer Science
2015-2017
- **Chanda Public School, Chandrapur**
SSC
2014-2015

Professional Experience

- **Zen Technologies — Jr Software Engineer**
April 2023 – PRESENT
 - **Project CTN (May 2025-Present)**
 - * Created a DLL-based IM Node Editor Module (pure c++) to visualize custom-made behavior trees.
 - * Developed a C++ interpreter to execute logic from the custom node-based editor.
 - * Implementing AI Framework in Native C++ integrated as dll in Unreal Engine
 - * Implementing AI Senses and Logic from scratch.
 - **Project Generic Soldier AI Module (Jan 2024-Present)**
 - * Implemented AI soldier swimming and climbing mechanics.
 - * Expanded a generic AI FPS module for more behaviors.
 - * Optimized Existing Custom Replay System in Native C++.
 - **Project Driving Training Simulator (April 2023-Jan 2024)**
 - * Implemented Traffic AI Vehicles using Unreal Chaos.
 - * Wrote Navigation algorithm in Unreal C++ with memory-safe logic.
 - * Used Unreal Insights to investigate latency
 - * Custom Serialization/De-serialization for Behavior Tree Design Pattern JSON for project configuration.
 - * Configured Chaos Physics for tyre burst, suspension, door-opening, etc.
 - * Integrated modular vehicle physics allowing toggling legacy physics.
 - * Enabled multiplayer mirrors without texture-based rendering.
- **A Plus Associates LLP — Unreal Engine Intern**
Sept 2022 - April 2023
 - Making assets and game mechanics for a hack n slash, top down perspective game.
 - Explored Health System, Inventory Management system and Fighting states.
 - Created 3 Levels: Ally map, Hallway map, and Room map.

Self Projects

- **Custom 2D Game Engine:** Making ECS driven 2d Game Engine Using open gl and glm libraries
- **Custom Turn Based Template:** Custom Turn based game template made in unreal engine

Skills

- **Hard Skills:** Unreal Engine, Unreal Engine Memory/CPU Profiler, Native C++, Blender, Dear IMGui, Basic Open-gl, Data Structures and Algorithms, Time Complexity and Optimization
- **Soft Skills:** Problem Solving, Observation, Decision Making, Communication

Achievements

- Gondwana University Topper in MHT-CET 2017
- Being part of Game simulation Projects Deployed for Indian Military
